

Creative Problem-Solving

Combine Divergent & Convergent Thinking

Ask Problems as Questions

"Yes, and" rather than "No, but"

1.

Define Problem

Ask who, what, when, where, why, and how about the problem

Learn all you can about the problem!

2.

Gather Data

3.

Ideate Solutions

Get all your ideas out there and then decide which one best addresses your problem

Create a physical rough draft that displays your idea.

4.

Prototype

5.

Test

Test out your solution on those who will use it
